**Subject: Introduction to Dynamic Security Est.**

Dear Sir,

We would like to take this opportunity to introduce Dynamic Security as a member of Atlas Telecommunication - one of the largest providers of security services in GCC.

Currently, we have the privilege of providing our security services to several prestigious organizations, which include Governments, Police, Military, Banks, Industrial, Private Sectors, Factories, and Retail Centers etc. We are keen to be associated with your esteemed organization and are confident that we can provide you with the highest level of service and meet all your requirements for security systems and services.

**Dynamic Security's strong presence and long experience in Middle East**, in particular in the UAE, shall enable a successful implementation of such a project, focusing in particular on the:

- Use of state-of-the-art technologies
- On time deployment of the systems
- Ability to manage multi-vendor and multi-system based services

In Electronic Security, Dynamic Security concentrates on providing state-of-the-art services for Design, Installation, Commissioning and Life Cycle Management of the following systems:

- **Integrated Security Systems (Access Control, CCTV, Alarm, Intercom)**
- **Closed Circuit Television (CCTV)**
- **Access Control Systems**
- **Building Management Systems**
- **Lighting Control System**
- **Intruder Alarms**
- **Public Address System**
- **Time & Attendance**
- **ID Card Printing**
- **Perimeter Protection & Intruder Detection Systems**
- **Gate Barriers & Operators**
- **Metal Detectors**
- **X-Ray Machines**

Dynamic Security has no hardware affiliations and is, therefore, entirely free to select the best equipment for each individual application.

The above systems and services are tailor-made to individual needs and can accommodate the most simple to the most sophisticated requirements. This can range from defense to residential, commercial or banks to government organizations.

---

---

Dynamic Security has carried a number of prestigious projects. Additionally, we also have a prestigious client list that includes Government, Police, Military, Commercial and industrial clients.

**We would very much appreciate if you could spend some of your valuable time to study our enclosed profile and pre-qualify us as one of the approved suppliers / brand of products in your future projects.**

Please feel free to contact us for any Security System Design and Specification requirements.

Assuring you of our best attention at all times, we remain.

Yours sincerely,

**Mohamed Seddiq Al Mutawa**

CEO

## Company Overview

**Atlas Telecom** is a premium telecommunications and Security company specializing as a system integrator, distributor and marketing representative for the Middle East. Founded in 1983 in Abu Dhabi, Atlas Telecommunications has since expanded to serve the entire GCC region. The company now employs over 400 personnel across two offices and workshops, and is continuing to experience rapid growth. In 2004, there was an opening of a specially designed service centre for the repair and maintenance of our Telecommunications and Electronic Security division's products and the creation of a separate division for our recent successes in the supply of satellite based internet services—the Satellite Communication Division.

At Atlas we help our broad base of customers, ranging from departments of the UAE military and government to international businesses and private clients to address complex technology issues. Through our wealth of expertise, we provide clients with expert advice across four industry sectors:

- 1) Telecom Division - Telecom
- 2) Dynamic Security Division – Dynamic Security**
- 3) Satellite Communications Division - SatCom
- 4) Command and Control Systems Division - CCS

## Dynamic Security

In this very dynamic world of today, one security product, solution or measure is not solid enough. Thus a dynamic security solution becomes essential to continuity.

One might not notice the danger that he, she or the company is facing until a time it is too late.

Dynamic Security transfers the control into your own hands to give you the full control to set the level of security you desire at any time.

We found security is not limited to physical assets of the company and owners but it extends to company time, efforts, intellectual property and others that are essential to business continuity and competitiveness on this very small "Global Village".
